

Product datasheet for **SC209125**

Aminoadipate aminotransferase (AADAT) (NM_016228) Human 3' UTR Clone

Product data:

Product Type: 3' UTR Clones
Product Name: Aminoadipate aminotransferase (AADAT) (NM_016228) Human 3' UTR Clone
Vector: pMirTarget (PS100062)
Symbol: AADAT
Synonyms: KAT2; KATII; KYAT2
ACCN: NM_016228
Insert Size: 736 bp
Insert Sequence: >SC209125 3'UTR clone of NM_016228
The sequence shown below is from the reference sequence of NM_016228. The complete sequence of this clone may contain minor differences, such as SNPs.

Components:	The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.
RefSeq:	NM_016228.4
Summary:	This gene encodes a protein that is highly similar to mouse and rat kynurenine aminotransferase II. The rat protein is a homodimer with two transaminase activities. One activity is the transamination of alpha-amino adipic acid, a final step in the saccharopine pathway which is the major pathway for L-lysine catabolism. The other activity involves the transamination of kynurenine to produce kynurenine acid, the precursor of kynurenic acid which has neuroprotective properties. Several transcript variants encoding two different isoforms have been found for this gene. [provided by RefSeq, Nov 2013]
Locus ID:	51166
MW:	27.9
