|-----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| OTI Disclaimer: | Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences , e.g., single nucleotide polymorphisms (SNPs). |
| Components:     | The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.                                                                                             |
| RefSeq:         | <u><a href="#">NM_053005.5</a></u>                                                                                                                                                                                                                                                         |
| Summary:        | Stimulates the autophosphorylation and kinase activity of STK38 and STK38L.<br>[UniProtKB/Swiss-Prot Function]                                                                                                                                                                             |
| Locus ID:       | 81532                                                                                                                                                                                                                                                                                      |
| MW:             | 28.1                                                                                                                                                                                                                                                                                       |
