

Product datasheet for **SC210098**

BLMH (NM_000386) Human 3' UTR Clone

Product data:

Product Type: 3' UTR Clones
Product Name: BLMH (NM_000386) Human 3' UTR Clone
Vector: pMirTarget (PS100062)
Symbol: BLMH
Synonyms: BH; BMH
ACCN: NM_000386
Insert Size: 844 bp
Insert Sequence: >SC210098 3'UTR clone of NM_000386
The sequence shown below is from the reference sequence of NM_000386. The complete sequence of this clone may contain minor differences, such as SNPs.
Blue=Stop Codon **Red**=Cloning site

Restriction Sites: SgfI-MluI
OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences, e.g., single nucleotide polymorphisms (SNPs).

Components:	The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.
RefSeq:	NM_000386.4
Summary:	Bleomycin hydrolase (BMH) is a cytoplasmic cysteine peptidase that is highly conserved through evolution; however, the only known activity of the enzyme is metabolic inactivation of the glycopeptide bleomycin (BLM), an essential component of combination chemotherapy regimens for cancer. The protein contains the signature active site residues of the cysteine protease papain superfamily. [provided by RefSeq, Jul 2008]
Locus ID:	642
MW:	31.1
