

## Product datasheet for **SC210948**

### ZNF672 (NM\_024836) Human 3' UTR Clone

#### Product data:

**Product Type:** 3' UTR Clones

**Symbol:** ZNF672

**Mammalian Cell** Neomycin

**Selection:**

**Vector:** pMirTarget (PS100062)

**ACCN:** NM\_024836

**Insert Size:** 914 bp

**Insert Sequence:** >SC210948 3'UTR clone of NM\_024836  
The sequence shown below is from the reference sequence of NM\_024836. The complete sequence of this clone may contain minor differences, such as SNPs.  
**Blue**=Stop Codon **Red**=Cloning site

|                        |                                                                                                                                                                                                                                                                                            |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>OTI Disclaimer:</b> | Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences , e.g., single nucleotide polymorphisms (SNPs). |
| <b>Components:</b>     | The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.                                                                                             |
| <b>Note:</b>           | Plasmids are not sterile. For experiments where strict sterility is required, filtration with 0.22um filter is required.                                                                                                                                                                   |
| <b>RefSeq:</b>         | <a href="#">NM_024836.3</a>                                                                                                                                                                                                                                                                |
| <b>Summary:</b>        | May be involved in transcriptional regulation.[UniProtKB/Swiss-Prot Function]                                                                                                                                                                                                              |
| <b>Locus ID:</b>       | 79894                                                                                                                                                                                                                                                                                      |
| <b>MW:</b>             | 33.4                                                                                                                                                                                                                                                                                       |
