

Product datasheet for **SC211942**

MBD1 (NM_015846) Human 3' UTR Clone

Product data:

Product Type: 3' UTR Clones
Product Name: MBD1 (NM_015846) Human 3' UTR Clone
Vector: pMirTarget (PS100062)
Symbol: MBD1
Synonyms: CXXC3; PCM1; RFT
ACCN: NM_015846
Insert Size: 1035 bp
Insert Sequence: >SC211942 3'UTR clone of NM_015846
The sequence shown below is from the reference sequence of NM_015846. The complete sequence of this clone may contain minor differences, such as SNPs.
Blue=Stop Codon **Red**=Cloning site

|------------------------|--|
| OTI Disclaimer: | Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences , e.g., single nucleotide polymorphisms (SNPs). |
| Components: | The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials. |
| RefSeq: | NM_015846.4 |
| Summary: | The protein encoded by this gene is a member of a family of nuclear proteins related by the presence of a methyl-CpG binding domain (MBD). These proteins are capable of binding specifically to methylated DNA, and some members can also repress transcription from methylated gene promoters. This protein contains multiple domains: MBD at the N-terminus that functions both in binding to methylated DNA and in protein interactions; several CXXC-type zinc finger domains that mediate binding to non-methylated CpG dinucleotides; transcriptional repression domain (TRD) at the C-terminus that is involved in transcription repression and in protein interactions. Numerous alternatively spliced transcript variants encoding different isoforms have been noted for this gene.[provided by RefSeq, Feb 2011] |
