

Product datasheet for **SC212404**

LAP2 (TMPO) (NM_001032283) Human 3' UTR Clone

Product data:

Product Type:	3' UTR Clones
Product Name:	LAP2 (TMPO) (NM_001032283) Human 3' UTR Clone
Vector:	pMirTarget (PS100062)
Symbol:	TMPO
Synonyms:	CMD1T; LAP2; LEMD4; PRO0868; TP
ACCN:	NM_001032283
Insert Size:	2000 bp

[View online »](#)

Insert Sequence: >SC212404 3'UTR clone of NM_001032283
 The sequence shown below is from the reference sequence of NM_001032283. The complete sequence of this clone may contain minor differences, such as SNPs.

Restriction Sites: SgfI-MluI

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences, e.g., single nucleotide polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.

RefSeq: [NM_001032283.3](#)

Summary:

Through alternative splicing, this gene encodes several distinct LEM domain containing protein isoforms. LEM domain proteins include inner nuclear membrane and intranuclear proteins, and are involved in a variety of cellular functions including gene expression, chromatin organization, and replication and cell cycle control. The encoded alpha isoform is broadly diffuse in the nucleus and contains a lamin binding domain, while the beta and gamma isoforms are localized to the nuclear membrane and contain an HDAC3 interaction domain. The distinct isoforms may compete with each other when acting to chaperone other proteins and regulate transcription. [provided by RefSeq, Aug 2019]
