

Product datasheet for **SC212933**

NNT (NM_182977) Human 3' UTR Clone

Product data:

Product Type:	3' UTR Clones
Product Name:	NNT (NM_182977) Human 3' UTR Clone
Vector:	pMirTarget (PS100062)
Symbol:	NNT
Synonyms:	GCCD4
ACCN:	NM_182977
Insert Size:	2000 bp

[View online »](#)

Insert Sequence: >SC212933 3'UTR clone of NM_182977
 The sequence shown below is from the reference sequence of NM_182977. The complete sequence of this clone may contain minor differences, such as SNPs.
 Blue=Stop Codon Red=Cloning site

Restriction Sites: SgfI-MluI

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences, e.g., single nucleotide polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.

RefSeq: [NM_182977.3](#)

Summary: This gene encodes an integral protein of the inner mitochondrial membrane. The enzyme couples hydride transfer between NAD(H) and NADP(+) to proton translocation across the inner mitochondrial membrane. Under most physiological conditions, the enzyme uses energy from the mitochondrial proton gradient to produce high concentrations of NADPH. The resulting NADPH is used for biosynthesis and in free radical detoxification. [provided by RefSeq, Sep 2016]
