

Product datasheet for **SC213305**

DPF2 (NM_006268) Human 3' UTR Clone

Product data:

Product Type:	3' UTR Clones
Product Name:	DPF2 (NM_006268) Human 3' UTR Clone
Symbol:	DPF2
Synonyms:	CSS7; REQ; ubi-d4; UBID4
Mammalian Cell Selection:	Neomycin
Vector:	pMirTarget (PS100062)
ACCN:	NM_006268
Insert Size:	2000 bp

[View online »](#)

Insert Sequence: >SC213305 3'UTR clone of NM_006268
The sequence shown below is from the reference sequence of NM_006268. The complete sequence of this clone may contain minor differences, such as SNPs.
Blue=Stop Codon **Red**=Cloning site

Restriction Sites: Sgfl-MluI

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences , e.g., single nucleotide polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.

RefSeq: [NM_006268.5](#)

Summary:	The protein encoded by this gene is a member of the d4 domain family, characterized by a zinc finger-like structural motif. This protein functions as a transcription factor which is necessary for the apoptotic response following deprivation of survival factors. It likely serves a regulatory role in rapid hematopoietic cell growth and turnover. This gene is considered a candidate gene for multiple endocrine neoplasia type I, an inherited cancer syndrome involving multiple parathyroid, enteropancreatic, and pituitary tumors.
