Product datasheet for SC214310

TNIK (NM_001161561) Human 3' UTR Clone

Product data:

Product Type:	3' UTR Clones
Product Name:	TNIK (NM_001161561) Human 3' UTR Clone
Vector:	pMirTarget (PS100062)
Symbol:	TNIK
Synonyms:	MRT54
ACCN:	NM_001161561
Insert Size:	2000 bp

View online »

Insert Sequence:

>SC214310 3'UTR clone of NM_001161561
The sequence shown below is from the reference sequence of NM_001161561. The complete sequence of this clone may contain minor differences, such as SNPs.

Restriction Sites: SgfI-MluI

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences , e.g., single nucleotide polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.

RefSeq: NM_001161561.3

Summary:	Wnt signaling plays important roles in carcinogenesis and embryonic development. The protein encoded by this gene is a serine/threonine kinase that functions as an activator of the Wnt signaling pathway. Mutations in this gene are associated with an autosomal recessive form of cognitive disability. Alternative splicing results in multiple transcript variants encoding different isoforms.
