

Product datasheet for **SC214379**

Proteinase Activated Receptor 4 (F2RL3) (NM_003950) Human 3' UTR Clone

Product data:

Product Type:	3' UTR Clones
Product Name:	Proteinase Activated Receptor 4 (F2RL3) (NM_003950) Human 3' UTR Clone
Symbol:	Proteinase Activated Receptor 4
Synonyms:	PAR4
Mammalian Cell Selection:	Neomycin
Vector:	pMirTarget (PS100062)
ACCN:	NM_003950
Insert Size:	2000 bp

[View online »](#)

Insert Sequence: >SC214379 3'UTR clone of NM_003950
The sequence shown below is from the reference sequence of NM_003950. The complete sequence of this clone may contain minor differences, such as SNPs.
Blue=Stop Codon **Red**=Cloning site

Restriction Sites: Sgfl-MluI

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences , e.g., single nucleotide polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.

RefSeq: [NM_003950.4](#)

Summary:	This gene encodes a member of the protease-activated receptor subfamily, part of the G-protein coupled receptor 1 family of proteins. The encoded receptor is proteolytically processed to reveal an extracellular N-terminal tethered ligand that binds to and activates the receptor. This receptor plays a role in blood coagulation, inflammation and response to pain. Hypomethylation at this gene may be associated with lung cancer in human patients. [provided by RefSeq, Sep 2016]
