

Product datasheet for **SC214698**

Cortactin (CTTN) (NM_138565) Human 3' UTR Clone

Product data:

Product Type:	3' UTR Clones
Product Name:	Cortactin (CTTN) (NM_138565) Human 3' UTR Clone
Vector:	pMirTarget (PS100062)
Symbol:	CTTN
Synonyms:	EMS1
ACCN:	NM_138565
Insert Size:	1443 bp

[View online »](#)

Insert Sequence: >SC214698 3'UTR clone of NM_138565
 The sequence shown below is from the reference sequence of NM_138565. The complete sequence of this clone may contain minor differences, such as SNPs.

Restriction Sites: Sgfl-MluI

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences , e.g., single nucleotide polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.

RefSeq: [NM_138565.3](#)

Summary: This gene is overexpressed in breast cancer and squamous cell carcinomas of the head and neck. The encoded protein is localized in the cytoplasm and in areas of the cell-substratum contacts. This gene has two roles: (1) regulating the interactions between components of adherens-type junctions and (2) organizing the cytoskeleton and cell adhesion structures of epithelia and carcinoma cells. During apoptosis, the encoded protein is degraded in a caspase-dependent manner. The aberrant regulation of this gene contributes to tumor cell invasion and metastasis. Three splice variants that encode different isoforms have been identified for this gene. [provided by RefSeq, May 2010]
