

Product datasheet for **SC214990**

Bcl x (BCL2L1) (NM_001191) Human 3' UTR Clone

Product data:

Product Type:	3' UTR Clones
Product Name:	Bcl x (BCL2L1) (NM_001191) Human 3' UTR Clone
Vector:	pMirTarget (PS100062)
Symbol:	BCL2L1
Synonyms:	Bcl-X; BCL-XL/S; BCL2L; BCLX; PPP1R52
ACCN:	NM_001191
Insert Size:	1521 bp

[View online »](#)

Insert Sequence: >SC214990 3'UTR clone of NM_001191
 The sequence shown below is from the reference sequence of NM_001191. The complete sequence of this clone may contain minor differences, such as SNPs.

Restriction Sites: SgfI-MluI

OTI Disclaimer: Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences, e.g., single nucleotide polymorphisms (SNPs).

Components: The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.

RefSeq: [NM_001191.4](#)

Summary:

The protein encoded by this gene belongs to the BCL-2 protein family. BCL-2 family members form hetero- or homodimers and act as anti- or pro-apoptotic regulators that are involved in a wide variety of cellular activities. The proteins encoded by this gene are located at the outer mitochondrial membrane, and have been shown to regulate outer mitochondrial membrane channel (VDAC) opening. VDAC regulates mitochondrial membrane potential, and thus controls the production of reactive oxygen species and release of cytochrome C by mitochondria, both of which are the potent inducers of cell apoptosis. Alternative splicing results in multiple transcript variants encoding two different isoforms. The longer isoform acts as an apoptotic inhibitor and the shorter isoform acts as an apoptotic activator.
