

## Product datasheet for **SC217268**

### Neuronal membrane glycoprotein M6 a (GPM6A) (NM\_201592) Human 3' UTR Clone

#### Product data:

Product Type:	3' UTR Clones
Product Name:	Neuronal membrane glycoprotein M6 a (GPM6A) (NM_201592) Human 3' UTR Clone
Symbol:	Neuronal membrane glycoprotein M6 a
Synonyms:	GPM6; M6A
Mammalian Cell Selection:	Neomycin
Vector:	pMirTarget (PS100062)
ACCN:	NM_201592
Insert Size:	1998 bp

[View online »](#)

**Insert Sequence:**

>SC217268 3'UTR clone of NM\_201592

The sequence shown below is from the reference sequence of NM\_201592. The complete sequence of this clone may contain minor differences, such as SNPs.

**OTI Disclaimer:**

Our molecular clone sequence data has been matched to the sequence identifier above as a point of reference. Note that the complete sequence of this clone is largely the same as the reference sequence but may contain minor differences , e.g., single nucleotide polymorphisms (SNPs).

**Components:**

The cDNA clone is shipped in a 2-D bar-coded Matrix tube as 10 ug dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.

**RefSeq:**

[NM\\_201592.3](#)

**Summary:** Involved in neuronal differentiation, including differentiation and migration of neuronal stem cells. Plays a role in neuronal plasticity and is involved in neurite and filopodia outgrowth, filopodia motility and probably synapse formation. GPM6A-induced filopodia formation involves mitogen-activated protein kinase (MAPK) and Src signaling pathways. May be involved in neuronal NGF-dependent Ca(2+) influx. May be involved in regulation of endocytosis and intracellular trafficking of G-protein-coupled receptors (GPCRs); enhances internalization and recycling of mu-type opioid receptor.[UniProtKB/Swiss-Prot Function]

**Locus ID:** 2823

**MW:** 78
