

Product datasheet for SC302029

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

SULT1A4 (NM_001017389) Human Untagged Clone

Product data:

Product Type: Expression Plasmids

Product Name: SULT1A4 (NM 001017389) Human Untagged Clone

Tag: Tag Free Symbol: SULT1A4

Synonyms: aryl sulfotransferase; phenol sulfotransferase; sulfokinase; sulfotransferase family, cytosolic,

1A, phenol-preferring, member 4

Mammalian Cell

Selection:

None

Vector: pCMV6-XL4

E. coli Selection: Ampicillin (100 ug/mL)

Fully Sequenced ORF: >NCBI ORF sequence for NM_001017389, the custom clone sequence may differ by one or

more nucleotides

Restriction Sites: Notl-Notl

ACCN: NM_001017389

Insert Size: 1100 bp

SULT1A4 (NM_001017389) Human Untagged Clone - SC302029

OTI Disclaimer: Our molecular clone sequence data has been matched to the reference identifier above as a

point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative

RNA splicing form or single nucleotide polymorphism (SNP).

OTI Annotation: This TrueClone is provided through our Custom Cloning Process that includes sub-cloning

into OriGene's pCMV6 vector and full sequencing to provide a non-variant match to the expected reference without frameshifts, and is delivered as lyophilized plasmid DNA.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 001017389.1</u>, <u>NP 001017389.1</u>

 RefSeq Size:
 1574 bp

 RefSeq ORF:
 888 bp

 Locus ID:
 445329

 Cytogenetics:
 16p11.2

Protein Pathways: Sulfur metabolism

Gene Summary: Sulfotransferase enzymes catalyze the sulfate conjugation of many hormones,

neurotransmitters, drugs, and xenobiotic compounds. These cytosolic enzymes are different in their tissue distributions and substrate specificities. The gene structure (number and

length of exons) is similar among family members. This gene encodes a phenol

sulfotransferase with thermolabile enzyme activity. Four sulfotransferase genes are located on the p arm of chromosome 16, this gene and SULT1A3 arose from a segmental duplication.

Read-through transcription exists between this gene and the upstream SLX1B (SLX1

structure-specific endonuclease subunit homolog B) gene that encodes a protein containing

GIY-YIG domains. [provided by RefSeq, Nov 2010]

Transcript Variant: This variant (1) is the longest variant. Variants 1 and 2 encode the same

protein.
