

Product datasheet for **SC307431**

BCL9L (NM_182557) Human Untagged Clone

Product data:

Product Type: Expression Plasmids
Product Name: BCL9L (NM_182557) Human Untagged Clone
Tag: Tag Free
Symbol: BCL9L
Synonyms: B9L; BCL9-2; DLNB11
Mammalian Cell Selection: None
Vector: pCMV6-XL4
E. coli Selection: Ampicillin (100 ug/mL)

Fully Sequenced ORF: >OriGene sequence for NM_182557 edited

Restriction Sites:	Please inquire
ACCN:	NM_182557
OTI Disclaimer:	Our molecular clone sequence data has been matched to the reference identifier above as a point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative RNA splicing form or single nucleotide polymorphism (SNP).
OTI Annotation:	The open reading frame of this TrueClone was fully sequenced and found to be a perfect match to the protein associated to this reference.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	<ol style="list-style-type: none">1. Centrifuge at 5,000xg for 5min.2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.3. Close the tube and incubate for 10 minutes at room temperature.4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.
RefSeq:	NM_182557.1 , NP_872363.1
RefSeq Size:	7539 bp
RefSeq ORF:	4500 bp
Locus ID:	283149
UniProt ID:	Q86UU0
Cytogenetics:	11q23.3
Gene Summary:	Transcriptional regulator that acts as an activator. Promotes beta-catenin transcriptional activity. Plays a role in tumorigenesis. Enhances the neoplastic transforming activity of CTNNB1 (By similarity).[UniProtKB/Swiss-Prot Function]
