

Product datasheet for **SC308979**

NK TR protein (NKTR) (NM_005385) Human Untagged Clone

Product data:

Product Type:	Expression Plasmids
Product Name:	NK TR protein (NKTR) (NM_005385) Human Untagged Clone
Tag:	Tag Free
Symbol:	NK TR protein
Synonyms:	p104
Mammalian Cell Selection:	Neomycin
Vector:	pCMV6-Entry (PS100001)
E. coli Selection:	Kanamycin (25 ug/mL)
Fully Sequenced ORF:	>SC308979 representing NM_005385. Blue=Insert sequence Red=Cloning site Green=Tag(s)

Restriction Sites: SgfI-MluI
ACCN: NM_005385
Insert Size: 4389 bp

OTI Disclaimer:	Our molecular clone sequence data has been matched to the reference identifier above as a point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative RNA splicing form or single nucleotide polymorphism (SNP).
OTI Annotation:	This TrueClone is provided through our Custom Cloning Process that includes sub-cloning into OriGene's pCMV6 vector and full sequencing to provide a non-variant match to the expected reference without frameshifts, and is delivered as lyophilized plasmid DNA.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	<ol style="list-style-type: none">1. Centrifuge at 5,000xg for 5min.2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.3. Close the tube and incubate for 10 minutes at room temperature.4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.
RefSeq:	NM_005385.3
RefSeq Size:	7312 bp
RefSeq ORF:	4389 bp
Locus ID:	4820
UniProt ID:	P30414
Cytogenetics:	3p22.1
Domains:	pro_isomerase
Protein Families:	Druggable Genome
MW:	165.7 kDa
Gene Summary:	<p>This gene encodes a membrane-anchored protein with a hydrophobic amino terminal domain and a cyclophilin-like PPIase domain. It is present on the surface of natural killer cells and facilitates their binding to targets. Its expression is regulated by IL2 activation of the cells. [provided by RefSeq, Jul 2008]</p> <p>Transcript Variant: This variant (1) uses an alternate in-frame splice junction compared to variant 3. The resulting isoform (a) has the same N- and C-termini but is 1 aa shorter compared to isoform c.</p>
