

## Product datasheet for SC309061

### Attractin (ATRN) (NM\_139321) Human Untagged Clone

#### Product data:

Product Type:	Expression Plasmids
Product Name:	Attractin (ATRN) (NM_139321) Human Untagged Clone
Tag:	Tag Free
Symbol:	ATRN
Synonyms:	DPPT-L; MGCA
Mammalian Cell Selection:	Neomycin
Vector:	pCMV6-Entry (PS100001)
E. coli Selection:	Kanamycin (25 ug/mL)
Fully Sequenced ORF:	>SC309061 representing NM_139321. Blue=Insert sequence Red=Cloning site Green=Tag(s)

**Restriction Sites:** SgfI-RsrII  
**Plasmid Map:** □  
**ACCN:** NM\_139321  
**Insert Size:** 4290 bp

<b>OTI Disclaimer:</b>	Our molecular clone sequence data has been matched to the reference identifier above as a point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative RNA splicing form or single nucleotide polymorphism (SNP).
<b>OTI Annotation:</b>	This TrueClone is provided through our Custom Cloning Process that includes sub-cloning into OriGene's pCMV6 vector and full sequencing to provide a non-variant match to the expected reference without frameshifts, and is delivered as lyophilized plasmid DNA.
<b>Components:</b>	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
<b>Reconstitution Method:</b>	<ol style="list-style-type: none"> <li>1. Centrifuge at 5,000xg for 5min.</li> <li>2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>3. Close the tube and incubate for 10 minutes at room temperature.</li> <li>4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>
<b>RefSeq:</b>	<u><a href="#">NM_139321.2</a></u>
<b>RefSeq Size:</b>	8658 bp
<b>RefSeq ORF:</b>	4290 bp
<b>Locus ID:</b>	8455
<b>UniProt ID:</b>	<u><a href="#">O75882</a></u>
<b>Cytogenetics:</b>	20p13
<b>Domains:</b>	CUB, CLECT, EGF_Lam, PSI, PSI, EGF, Kelch
<b>Protein Families:</b>	Druggable Genome, Secreted Protein, Transmembrane
<b>MW:</b>	158.5 kDa
<b>Gene Summary:</b>	<p>This gene encodes both membrane-bound and secreted protein isoforms. A membrane-bound isoform exhibits sequence similarity with the mouse mahogany protein, a receptor involved in controlling obesity. A secreted isoform is involved in the initial immune cell clustering during inflammatory responses that may regulate the chemotactic activity of chemokines. [provided by RefSeq, Apr 2016]</p> <p>Transcript Variant: This variant (1) encodes the longest protein (isoform 1), which is contained in the membrane. Sequence Note: The RefSeq transcript and protein were derived from transcript and genomic sequence to make the sequence consistent with the reference genome assembly. The genomic coordinates used for the transcript record were based on alignments.</p>
