

## Product datasheet for **SC310291**

### TRAF3IP3 (NM\_025228) Human Untagged Clone

#### Product data:

Product Type:	Expression Plasmids
Product Name:	TRAF3IP3 (NM_025228) Human Untagged Clone
Tag:	Tag Free
Symbol:	TRAF3IP3
Synonyms:	T3JAM
Mammalian Cell Selection:	Neomycin
Vector:	pCMV6-Entry (PS100001)
E. coli Selection:	Kanamycin (25 ug/mL)
Restriction Sites:	Sgfl-MluI
ACCN:	NM_025228
Insert Size:	1656 bp
OTI Disclaimer:	Our molecular clone sequence data has been matched to the reference identifier above as a point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative RNA splicing form or single nucleotide polymorphism (SNP).
OTI Annotation:	This TrueClone is provided through our Custom Cloning Process that includes sub-cloning into OriGene's pCMV6 vector and full sequencing to provide a non-variant match to the expected reference without frameshifts, and is delivered as lyophilized plasmid DNA.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	<ol style="list-style-type: none"><li>1. Centrifuge at 5,000xg for 5min.</li><li>2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li><li>3. Close the tube and incubate for 10 minutes at room temperature.</li><li>4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li><li>5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li></ol>
RefSeq:	<a href="#">NM_025228.3</a>

[View online »](#)

RefSeq Size: 2284 bp

RefSeq ORF: 1656 bp

Locus ID: 80342

UniProt ID: [Q9Y228](#)

Cytogenetics: 1q32.2

Protein Families: Druggable Genome, Transmembrane

MW: 63.6 kDa

**Gene Summary:** The gene encodes a protein that mediates cell growth by modulating the c-Jun N-terminal kinase signal transduction pathway. The encoded protein may also interact with a large multi-protein assembly containing the phosphatase 2A catalytic subunit. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Dec 2013]  
Transcript Variant: This variant (1) encodes the longest isoform (1). Variants 1 and 4 both encode the same isoform (1).
