

Product datasheet for **SC312043**

GABA B Receptor 1 (GABBR1) (AK054975) Human Untagged Clone

Product data:

| | |
|------------------------|---|
| Product Type: | Expression Plasmids |
| Product Name: | GABA B Receptor 1 (GABBR1) (AK054975) Human Untagged Clone |
| Tag: | Tag Free |
| Symbol: | GABBR1 |
| Vector: | <u>pCMV6 series</u> |
| Fully Sequenced ORF: | >NCBI ORF sequence for AK054975, the custom clone sequence may differ by one or more nucleotides |
| Restriction Sites: | Please inquire |
| ACCN: | AK054975 |
| OTI Disclaimer: | Our molecular clone sequence data has been matched to the reference identifier above as a point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative RNA splicing form or single nucleotide polymorphism (SNP). |
| OTI Annotation: | This TrueClone is provided through our Custom Cloning Process that includes sub-cloning into OriGene's pCMV6 vector and full sequencing to provide a non-variant match to the expected reference without frameshifts, and is delivered as lyophilized plasmid DNA. |
| Components: | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water). |
| Reconstitution Method: | <ol style="list-style-type: none">1. Centrifuge at 5,000xg for 5min.2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.3. Close the tube and incubate for 10 minutes at room temperature.4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C. |
| RefSeq: | <u>AK054975.1</u> |
| RefSeq Size: | 1753 bp |
| RefSeq ORF: | 1753 bp |

|--------------------------|--|
| Locus ID: | 2550 |
| Cytogenetics: | 6p22.1 |
| Protein Families: | Druggable Genome, GPCR, Secreted Protein, Transmembrane |
| Protein Pathways: | Neuroactive ligand-receptor interaction |
| Gene Summary: | <p>This gene encodes a receptor for gamma-aminobutyric acid (GABA), which is the main inhibitory neurotransmitter in the mammalian central nervous system. This receptor functions as a heterodimer with GABA(B) receptor 2. Defects in this gene may underlie brain disorders such as schizophrenia and epilepsy. Alternative splicing generates multiple transcript variants, but the full-length nature of some of these variants has not been determined. [provided by RefSeq, Jan 2016]</p> |
