

Product datasheet for SC313567

SUN1 (AK025737) Human Untagged Clone

Product data:

Product Type: Expression Plasmids

Product Name: SUN1 (AK025737) Human Untagged Clone

Tag: Tag Free

SUN1 Symbol:

Synonyms: UNC84A

Vector: pCMV6 series

>NCBI ORF sequence for AK025737, the custom clone sequence may differ by one or more **Fully Sequenced ORF:**

nucleotides

Restriction Sites: Please inquire

ACCN: AK025737

OTI Disclaimer: Our molecular clone sequence data has been matched to the reference identifier above as a

> point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative

RNA splicing form or single nucleotide polymorphism (SNP).

OTI Annotation: This TrueClone is provided through our Custom Cloning Process that includes sub-cloning

> into OriGene's pCMV6 vector and full sequencing to provide a non-variant match to the expected reference without frameshifts, and is delivered as lyophilized plasmid DNA.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: AK025737.1

RefSeq Size: 3489 bp

SUN1 (AK025737) Human Untagged Clone - SC313567

 RefSeq ORF:
 3489 bp

 Locus ID:
 23353

 Cytogenetics:
 7p22.3

Protein Families: Transmembrane

Gene Summary: This gene is a member of the unc-84 homolog family and encodes a nuclear envelope protein

with an Unc84 (SUN) domain. The protein is involved in nuclear anchorage and migration. Alternatively spliced transcript variants have been described. [provided by RefSeq, Jan 2019]
