

## Product datasheet for **SC314155**

### Fibulin 1 (FBLN1) (NM\_006485) Human Untagged Clone

#### Product data:

|               |  |
|---------------|--|
| Product Type: | Expression Plasmids                                |
| Product Name: | Fibulin 1 (FBLN1) (NM_006485) Human Untagged Clone |
| Tag:          | Tag Free   |
| Symbol:       | FBLN1  |
| Synonyms:     | FBLN; FIBL1  |
| Vector:       | <u>pCMV6 series</u>                                |

| <b>Restriction Sites:</b>   | Please inquire  |
| <b>ACCN:</b>                | NM_006485   |
| <b>OTI Disclaimer:</b>      | Our molecular clone sequence data has been matched to the reference identifier above as a point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative RNA splicing form or single nucleotide polymorphism (SNP).  |
| <b>OTI Annotation:</b>      | This TrueClone is provided through our Custom Cloning Process that includes sub-cloning into OriGene's pCMV6 vector and full sequencing to provide a non-variant match to the expected reference without frameshifts, and is delivered as lyophilized plasmid DNA.  |
| <b>Components:</b>          | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).  |

**Reconstitution Method:**

1. Centrifuge at 5,000xg for 5min.
2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

**RefSeq:** [NM\\_006485.2](#), [NP\\_006476.2](#)

**RefSeq Size:** 2662 bp

**RefSeq ORF:** 1806 bp

**Locus ID:** 2192

**UniProt ID:** [P23142](#)

**Cytogenetics:** 22q13.31

**Protein Families:** Secreted Protein

**Gene Summary:** Fibulin 1 is a secreted glycoprotein that becomes incorporated into a fibrillar extracellular matrix. Calcium-binding is apparently required to mediate its binding to laminin and nidogen. It mediates platelet adhesion via binding fibrinogen. Four splice variants which differ in the 3' end have been identified. Each variant encodes a different isoform, but no functional distinctions have been identified among the four variants. [provided by RefSeq, Jul 2008]  
Transcript Variant: This variant (B) has an alternate 3' sequence, as compared to variant D. The encoded isoform B is shorter and has a distinct C-terminus, as compared to isoform D.
