C6orf70 (ERMARD) (AK002014) Human Untagged Clone

Product data:

Product Type: Expression Plasmids

Product Name: C6orf70 (ERMARD) (AK002014) Human Untagged Clone

Tag: Tag Free
Symbol: ERMARD

Synonyms: C6orf70; dJ266L20.3; PVNH6

Vector: <u>pCMV6 series</u>

Fully Sequenced ORF: >NCBI ORF sequence for AK002014, the custom clone sequence may differ by one or more

nucleotides

Restriction Sites: Please inquire

ACCN: AK002014

OTI Disclaimer: Our molecular clone sequence data has been matched to the reference identifier above as a

point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative

RNA splicing form or single nucleotide polymorphism (SNP).

OTI Annotation: This TrueClone is provided through our Custom Cloning Process that includes sub-cloning

into OriGene's pCMV6 vector and full sequencing to provide a non-variant match to the expected reference without frameshifts, and is delivered as lyophilized plasmid DNA.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>AK002014.1</u>, <u>BAA92035.1</u>

RefSeq Size: 2069 bp

C6orf70 (ERMARD) (AK002014) Human Untagged Clone - SC314402

RefSeq ORF: 2069 bp Locus ID: 55780 Cytogenetics: 6q27

Protein Families: Transmembrane

Gene Summary: The protein encoded by this gene contains 2 transmembrane domains near the C-terminus

and is localized in the endoplasmic reticulum. Knockout of this gene in developing rat brain showed that it may be involved in neuronal migration. Mutations in this gene are associated with periventricular nodular heterotopia-6 (PVNH6). Alternatively spliced transcript variants

have been found for this gene. [provided by RefSeq, Dec 2013]
