

Product datasheet for **SC315334**

ASTN2 (NM_014010) Human Untagged Clone

Product data:

Product Type: Expression Plasmids
Product Name: ASTN2 (NM_014010) Human Untagged Clone
Tag: Tag Free
Symbol: ASTN2
Synonyms: bA67K19.1
Vector: pCMV6-Entry (PS100001)
Fully Sequenced ORF: >SC315334 representing NM_014010.
 Blue=Insert sequence Red=Cloning site Green=Tag(s)

 TGA

- Restriction Sites:** SgfI-MluI
- ACCN:** NM_014010
- Insert Size:** 3867 bp
- OTI Disclaimer:** Our molecular clone sequence data has been matched to the reference identifier above as a point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative RNA splicing form or single nucleotide polymorphism (SNP).
- OTI Annotation:** This TrueClone is provided through our Custom Cloning Process that includes sub-cloning into OriGene's pCMV6 vector and full sequencing to provide a non-variant match to the expected reference without frameshifts, and is delivered as lyophilized plasmid DNA.
- Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method:

1. Centrifuge at 5,000xg for 5min.
2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

RefSeq: [NM_014010.3](#)

RefSeq Size: 4606 bp

RefSeq ORF: 3867 bp

Locus ID: 23245

UniProt ID: [O75129](#)

Cytogenetics: 9q33.1

Domains: MACPF, FN3

Protein Families: Transmembrane

MW: 142.5 kDa

Gene Summary: This gene encodes a protein that is expressed in the brain and may function in neuronal migration, based on functional studies of the related astrotactin 1 gene in human and mouse. A deletion at this locus has been associated with schizophrenia. Multiple transcript variants encoding different proteins have been found for this locus. [provided by RefSeq, May 2010]
Transcript Variant: This variant (1) represents the longest transcript and encodes the longest isoform (a).
