

Product datasheet for **SC317160**

DGKZ (NM_001105540) Human Untagged Clone

Product data:

Product Type: Expression Plasmids
Product Name: DGKZ (NM_001105540) Human Untagged Clone
Tag: Tag Free
Symbol: DGKZ
Synonyms: DAGK5; DAGK6; DGK-ZETA; hDGKzeta
Vector: pCMV6 series
Fully Sequenced ORF: >NCBI ORF sequence for NM_001105540, the custom clone sequence may differ by one or more nucleotides

```

ACCN:

NM_001105540

OTI Disclaimer:

Our molecular clone sequence data has been matched to the reference identifier above as a point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative RNA splicing form or single nucleotide polymorphism (SNP).

OTI Annotation:

This TrueClone is provided through our Custom Cloning Process that includes sub-cloning into OriGene's pCMV6 vector and full sequencing to provide a non-variant match to the expected reference without frameshifts, and is delivered as lyophilized plasmid DNA.

Components:

The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method:

1. Centrifuge at 5,000xg for 5min.
2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

RefSeq:	<u>NM_001105540.1, NP_001099010.1</u>
RefSeq Size:	4094 bp
RefSeq ORF:	3354 bp
Locus ID:	8525
UniProt ID:	<u>Q13574</u>
Cytogenetics:	11p11.2
Protein Families:	Druggable Genome
Protein Pathways:	Glycerolipid metabolism, Glycerophospholipid metabolism, Metabolic pathways, Phosphatidylinositol signaling system
Gene Summary:	<p>The protein encoded by this gene belongs to the eukaryotic diacylglycerol kinase family. It may attenuate protein kinase C activity by regulating diacylglycerol levels in intracellular signaling cascade and signal transduction. Alternative splicing occurs at this locus and multiple transcript variants encoding distinct isoforms have been identified. [provided by RefSeq, Nov 2010]</p> <p>Transcript Variant: This variant (4) encodes the longest isoform (4).</p>
