

Product datasheet for SC318554

RELCH (NM_020854) Human Untagged Clone

Product data:

Product Type:	Expression Plasmids
Product Name:	RELCH (NM_020854) Human Untagged Clone
Tag:	Tag Free
Symbol:	RELCH
Synonyms:	HsT885; HsT3308; KIAA1468
Mammalian Cell Selection:	Neomycin
Vector:	pCMV6-Entry (PS100001)
E. coli Selection:	Kanamycin (25 ug/mL)
Fully Sequenced ORF:	>SC318554 representing NM_020854. Blue=Insert sequence Red=Cloning site Green=Tag(s)

Restriction Sites:

Ascl-MluI

ACCN:

NM_020854

Insert Size:

3651 bp

OTI Disclaimer:

Our molecular clone sequence data has been matched to the reference identifier above as a point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative RNA splicing form or single nucleotide polymorphism (SNP).

OTI Annotation:

This TrueClone is provided through our Custom Cloning Process that includes sub-cloning into OriGene's pCMV6 vector and full sequencing to provide a non-variant match to the expected reference without frameshifts, and is delivered as lyophilized plasmid DNA.

Components:

The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method:

1. Centrifuge at 5,000xg for 5min.
2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

RefSeq: NM_020854.3

RefSeq Size: 5459 bp

RefSeq ORF: 3651 bp

Locus ID: 57614

UniProt ID: Q9P260

Cytogenetics: 18q21.33

Domains: HEAT

MW: 134.6 kDa

Gene Summary: Regulates intracellular cholesterol distribution from recycling endosomes to the trans-Golgi network through interactions with RAB11 and OSBP (PubMed:29514919). Functions in membrane tethering and promotes OSBP-mediated cholesterol transfer between RAB11-bound recycling endosomes and OSBP-bound Golgi-like membranes (PubMed:29514919). [UniProtKB/Swiss-Prot Function]

Transcript Variant: This variant (3), as well as variant 4, encodes isoform c.
