

Product datasheet for **SC321661**

SERPINB8 (NM_001031848) Human Untagged Clone

Product data:

Product Type: Expression Plasmids
Product Name: SERPINB8 (NM_001031848) Human Untagged Clone
Tag: Tag Free
Symbol: SERPINB8
Synonyms: C18orf53; CAP2; PI-8; PI8; PSS5
Mammalian Cell Selection: Neomycin
Vector: pCMV6-AC (PS100020)
E. coli Selection: Ampicillin (100 ug/mL)

Fully Sequenced ORF: >OriGene sequence for NM_001031848.1

| OTI Disclaimer: | Our molecular clone sequence data has been matched to the reference identifier above as a point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative RNA splicing form or single nucleotide polymorphism (SNP). |
| OTI Annotation: | This TrueClone is provided through our Custom Cloning Process that includes sub-cloning into OriGene's pCMV6 vector and full sequencing to provide a non-variant match to the expected reference without frameshifts, and is delivered as lyophilized plasmid DNA. |
| Components: | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water). |
| Reconstitution Method: | <ol style="list-style-type: none">1. Centrifuge at 5,000xg for 5min.2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.3. Close the tube and incubate for 10 minutes at room temperature.4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C. |
| RefSeq: | NM_001031848.1 , NP_001027018.1 |
| RefSeq Size: | 1409 bp |
| RefSeq ORF: | 729 bp |
| Locus ID: | 5271 |
| UniProt ID: | P50452 |
| Cytogenetics: | 18q22.1 |
| Protein Families: | Druggable Genome |
| Gene Summary: | <p>The protein encoded by this gene is a member of the ov-serpin family of serine protease inhibitors. The encoded protein is produced by platelets and can bind to and inhibit the function of furin, a serine protease involved in platelet functions. In addition, this protein has been found to enhance the mechanical stability of cell-cell adhesion in the skin, and defects in this gene have been associated with an autosomal-recessive form of exfoliative ichthyosis. [provided by RefSeq, Jan 2017]</p> <p>Transcript Variant: This variant (3) uses an alternate splice junction in the 5' UTR and has an alternate 3'-most exon compared to variant 1. The resulting isoform (b) has a shorter and distinct C-terminus compared to isoform a.</p> |
