

## **Product datasheet for SC322048**

## MTCH1 (NM 014341) Human Untagged Clone

**Product data:** 

**Product Type:** Expression Plasmids

**Product Name:** MTCH1 (NM\_014341) Human Untagged Clone

Tag: Tag Free Symbol: MTCH1

Synonyms: CGI-64; PIG60; PSAP; SLC25A49

Mammalian Cell

Selection:

Neomycin

Vector:pCMV6-AC (PS100020)E. coli Selection:Ampicillin (100 ug/mL)

Fully Sequenced ORF: >NCBI ORF sequence for NM\_014341, the custom clone sequence may differ by one or more

nucleotides

## MTCH1 (NM\_014341) Human Untagged Clone - SC322048

**OTI Disclaimer:** Our molecular clone sequence data has been matched to the reference identifier above as a

point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative

RNA splicing form or single nucleotide polymorphism (SNP).

**OTI Annotation:** This TrueClone is provided through our Custom Cloning Process that includes sub-cloning

into OriGene's pCMV6 vector and full sequencing to provide a non-variant match to the

expected reference without frameshifts, and is delivered as lyophilized plasmid DNA.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: NM 014341.1, NP 055156.1

**RefSeq Size:** 1890 bp

**RefSeq ORF:** 1119 bp

**Locus ID:** 23787

UniProt ID: Q9NZJ7

Cytogenetics: 6p21.2

**Domains:** mito carr

**Protein Families:** Transmembrane

**Gene Summary:** This gene encodes a member of the mitochondrial carrier family. The encoded protein is

localized to the mitochondrion inner membrane and induces apoptosis independent of the proapoptotic proteins Bax and Bak. Pseudogenes on chromosomes 6 and 11 have been identified for this gene. Alternatively spliced transcript variants encoding multiple isoforms

have been observed. [provided by RefSeq, Oct 2012]

Transcript Variant: This variant (1) encodes the shorter isoform (PSAP-LS, PMID 18291114). Sequence Note: This RefSeq record was created from transcript and genomic sequence data

to make the sequence consistent with the reference genome assembly. The genomic coordinates used for the transcript record were based on transcript alignments.
