Product Type:	Expression Plasmids
Product Name:	HOMER3 (NM_001145724) Human Untagged Clone
Tag:	Tag Free
Symbol:	HOMER3
Synonyms:	HOMER-3; VESL3
Mammalian Cell Selection:	Neomycin
Vector:	pCMV6-Entry (PS100001)
E. coli Selection:	Kanamycin (25 ug/mL)
Fully Sequenced ORF:	>SC326559 representing NM_001145724. Blue=Insert sequence Red=Cloning site Green=Tag(s)

Restriction Sites:	TACAAGGATGACGACGATAAGGTTTAAACGGCCGGC Sgfl-Mlul
Reserved on Sites.	5 <u>0</u> 1 1101

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

### Plasmid Map:

ACCN:	NM 001145724
Insert Size:	978 bp
OTI Disclaimer:	Our molecular clone sequence data has been matched to the reference identifier above as a point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative RNA splicing form or single nucleotide polymorphism (SNP).
OTI Annotation:	This TrueClone is provided through our Custom Cloning Process that includes sub-cloning into OriGene's pCMV6 vector and full sequencing to provide a non-variant match to the expected reference without frameshifts, and is delivered as lyophilized plasmid DNA.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	<ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>
RefSeq:	<u>NM 001145724.1</u>
RefSeq Size:	1297 bp
RefSeq ORF:	978 bp
Locus ID:	9454

	HOMER3 (NM_001145724) Human Untagged Clone – SC326559
UniProt ID:	<u>Q9NSC5</u>
Cytogenetics:	19p13.11
Protein Families	: Druggable Genome
MW:	36 kDa
Gene Summary:	This gene encodes a member of the HOMER family of postsynaptic density scaffolding proteins that share a similar domain structure consisting of an N-terminal Enabled/vasodilator-stimulated phosphoprotein homology 1 domain which mediates protein- protein interactions, and a carboxy-terminal coiled-coil domain and two leucine zipper motifs that are involved in self-oligomerization. The encoded protein binds numerous other proteins including group I metabotropic glutamate receptors, inositol 1,4,5-trisphosphate receptors and amyloid precursor proteins and has been implicated in diverse biological functions such as neuronal signaling, T-cell activation and trafficking of amyloid beta peptides. Alternative splicing results in multiple transcript variants.[provided by RefSeq, Mar 2009] Transcript Variant: This variant (4), termed Homer-3B00, differs in the 5' UTR and lacks an exon in the coding region, compared to variant 1, but maintains the reading frame. The encoded isoform (3) is shorter than isoform 1.
