

## Product datasheet for **SC326659**

### HRH4 (NM\_001160166) Human Untagged Clone

#### Product data:

Product Type:	Expression Plasmids
Product Name:	HRH4 (NM_001160166) Human Untagged Clone
Tag:	Tag Free
Symbol:	HRH4
Synonyms:	AXOR35; BG26; GPCR105; GPRv53; H4; H4R; HH4R
Mammalian Cell Selection:	None
Vector:	<u>pCMV6-XL5</u>
E. coli Selection:	Ampicillin (100 ug/mL)
Fully Sequenced ORF:	>NCBI ORF sequence for NM_001160166, the custom clone sequence may differ by one or more nucleotides ATGCCAGATACTAATAGCACAATCAATTTATCACTAAGCACTCGTGTTACTTTAGCATT TTTATGTCTTAGTAGCTTTTGCTATAATGCTAGGAAATGCTTTGGTCATTTAGCTTTT GTGGTGGACAAAAACCTTAGACATCGAAGTAGTTATTTTTTTCTTAACCTGGCCATCTCT GACTTCTTTGTGGGTGTCTTA
Restriction Sites:	Please inquire
ACCN:	NM_001160166
OTI Disclaimer:	Our molecular clone sequence data has been matched to the reference identifier above as a point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative RNA splicing form or single nucleotide polymorphism (SNP).
OTI Annotation:	This TrueClone is provided through our Custom Cloning Process that includes sub-cloning into OriGene's pCMV6 vector and full sequencing to provide a non-variant match to the expected reference without frameshifts, and is delivered as lyophilized plasmid DNA.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

[View online »](#)

**Reconstitution Method:**

1. Centrifuge at 5,000xg for 5min.
2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

**RefSeq:** [NM\\_001160166.1](#), [NP\\_001153638.1](#)

**RefSeq Size:** 3522 bp

**RefSeq ORF:** 204 bp

**Locus ID:** 59340

**UniProt ID:** [Q9H3N8](#)

**Cytogenetics:** 18q11.2

**Protein Families:** Druggable Genome, GPCR, Transmembrane

**Protein Pathways:** Neuroactive ligand-receptor interaction

**Gene Summary:** Histamine is a ubiquitous messenger molecule released from mast cells, enterochromaffin-like cells, and neurons. Its various actions are mediated by a family of histamine receptors, which are a subset of the G-protein coupled receptor superfamily. This gene encodes a histamine receptor that is predominantly expressed in haematopoietic cells. The protein is thought to play a role in inflammation and allergy responses. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, May 2009] Transcript Variant: This variant (3) lacks an alternate coding exon resulting in a frameshift, compared to variant 1. The resulting isoform (3), also known as H4R(67), has a substantially shorter and distinct C-terminus, compared to isoform 1. Sequence Note: This RefSeq record was created from transcript and genomic sequence data to make the sequence consistent with the reference genome assembly. The genomic coordinates used for the transcript record were based on transcript alignments.
