

Product datasheet for **SC329482**

SEMA6D (NM_001198999) Human Untagged Clone

Product data:

Product Type:	Expression Plasmids
Product Name:	SEMA6D (NM_001198999) Human Untagged Clone
Tag:	Tag Free
Symbol:	SEMA6D
Vector:	pCMV6-Entry (PS100001)

[View online »](#)

Fully Sequenced ORF: >SC329482 representing NM_001198999.
 Blue=Insert sequence Red=Cloning site Green=Tag(s)

Restriction Sites: Sgfl-Mlul

Plasmid Map:

ACCN: NM_001198999

Insert Size: 3036 bp

OTI Disclaimer: Our molecular clone sequence data has been matched to the reference identifier above as a point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative RNA splicing form or single nucleotide polymorphism (SNP).

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method:

1. Centrifuge at 5,000xg for 5min.
2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

RefSeq: [NM_001198999.1](#)

RefSeq Size: 5935 bp

RefSeq ORF: 3036 bp

Locus ID: 80031

UniProt ID: [Q8NFY4](#)

Cytogenetics: 15q21.1

Protein Families: Druggable Genome, Transmembrane

Protein Pathways: Axon guidance

MW: 113.3 kDa

Gene Summary: Semaphorins are a large family, including both secreted and membrane associated proteins, many of which have been implicated as inhibitors or chemorepellents in axon pathfinding, fasciculation and branching, and target selection. All semaphorins possess a semaphorin (Sema) domain and a PSI domain (found in plexins, semaphorins and integrins) in the N-terminal extracellular portion. Additional sequence motifs C-terminal to the semaphorin domain allow classification into distinct subfamilies. Results demonstrate that transmembrane semaphorins, like the secreted ones, can act as repulsive axon guidance cues. This gene encodes a class 6 vertebrate transmembrane semaphorin that demonstrates alternative splicing. Several transcript variants have been identified and expression of the distinct encoded isoforms is thought to be regulated in a tissue- and development-dependent manner. [provided by RefSeq, Nov 2010]

Transcript Variant: This variant (7) uses an alternative splice site on one exon, lacks two internal exons, and differs in the 5' UTR, compared to variant 4. The encoded isoform (1) is missing an internal region compared to isoform 4 and contains an internal segment unique t
