## ST3GAL4 (NM\_001254757) Human Untagged Clone

#### **Product data:**

**Product Type:** Expression Plasmids

**Product Name:** ST3GAL4 (NM\_001254757) Human Untagged Clone

Tag: Tag Free Symbol: ST3GAL4

Synonyms: CGS23; gal-NAc6S; NANTA3; SAT3; SIAT4; SIAT4C; ST-4; ST3GalA.2; ST3GalIV; STZ

**Vector:** pCMV6-Entry (PS100001)

**Restriction Sites:** Sgfl-Mlul

**ACCN:** NM\_001254757

**Insert Size:** 1002 bp

**OTI Disclaimer:** Our molecular clone sequence data has been matched to the reference identifier above as a

point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative

RNA splicing form or single nucleotide polymorphism (SNP).

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

11q24.2

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 001254757.1</u>

 RefSeq Size:
 1854 bp

 RefSeq ORF:
 1002 bp

 Locus ID:
 6484

 UniProt ID:
 Q11206

Cytogenetics:

### ST3GAL4 (NM\_001254757) Human Untagged Clone - SC330331

**Protein Families:** Secreted Protein, Transmembrane

**Protein Pathways:** Glycosphingolipid biosynthesis - lacto and neolacto series, Metabolic pathways

MW: 38 kDa

**Gene Summary:** This gene encodes a member of the glycosyltransferase 29 family, a group of enzymes

involved in protein glycosylation. The encoded protein is targeted to Golgi membranes but may be proteolytically processed and secreted. The gene product may also be involved in the increased expression of sialyl Lewis X antigen seen in inflammatory responses. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by

RefSeq, Dec 2011]

Transcript Variant: This variant (2), as well as variants 3 and 8, encodes isoform 2. Sequence Note: This RefSeq record was created from transcript and genomic sequence data to make the sequence consistent with the reference genome assembly. The genomic coordinates used

for the transcript record were based on transcript alignments.
