

Product datasheet for SC331182

MIPOL 1 (MIPOL1) (NM_001195296) Human Untagged Clone

Product data:

Product Type: Expression Plasmids
Product Name: MIPOL 1 (MIPOL1) (NM_001195296) Human Untagged Clone
Tag: Tag Free
Symbol: MIPOL 1
Synonyms: CCDC193
Vector: pCMV6-Entry (PS100001)
Fully Sequenced ORF: >SC331182 representing NM_001195296.
 Blue=Insert sequence Red=Cloning site Green=Tag(s)

OTI Disclaimer:	Our molecular clone sequence data has been matched to the reference identifier above as a point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative RNA splicing form or single nucleotide polymorphism (SNP).
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	1. Centrifuge at 5,000xg for 5min. 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. 3. Close the tube and incubate for 10 minutes at room temperature. 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. 5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.
RefSeq:	<u>NM_001195296.1</u>
RefSeq Size:	6283 bp
RefSeq ORF:	1329 bp
Locus ID:	145282
UniProt ID:	<u>Q8TD10</u>
Cytogenetics:	14q13.3-q21.1
MW:	51.5 kDa
Gene Summary:	This gene encodes a coiled-coil domain-containing protein. The encoded protein may function as a tumor suppressor. A translocation that results in truncation of the protein encoded by this locus has been associated with mirror-image polydactyly, also known as Laurin-Sandrow Syndrome. Alternatively spliced transcript variants have been described. [provided by RefSeq, Sep 2010] Transcript Variant: This variant (1) represents the longest transcript. Variants 1, 2 and 3 encode the same protein. Sequence Note: This RefSeq record was created from transcript and genomic sequence data to make the sequence consistent with the reference genome assembly. The genomic coordinates used for the transcript record were based on transcript alignments.
