

## Product datasheet for **SC331790**

### **CATSPERE (NM\_001242340) Human Untagged Clone**

#### **Product data:**

Product Type:	Expression Plasmids
Product Name:	CATSPERE (NM_001242340) Human Untagged Clone
Tag:	Tag Free
Symbol:	CATSPERE
Synonyms:	C1orf101; C10orf101
Vector:	pCMV6-Entry (PS100001)

[View online »](#)

**Fully Sequenced ORF:** >SC331790 representing NM\_001242340.

**Restriction Sites:** Sgfl-Mlul

**ACCN:** NM\_001242340

**Insert Size:** 2403 bp

**OTI Disclaimer:** Our molecular clone sequence data has been matched to the reference identifier above as a point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative RNA splicing form or single nucleotide polymorphism (SNP).

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:**

1. Centrifuge at 5,000xg for 5min.
2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

**RefSeq:** [NM\\_001242340.1](#)

**RefSeq Size:** 3056 bp

**RefSeq ORF:** 2403 bp

**Locus ID:** 257044

**UniProt ID:** [Q5SY80](#)

**Cytogenetics:** 1q44

**MW:** 92.3 kDa

**Gene Summary:** Auxiliary component of the CatSper complex, a complex involved in sperm cell hyperactivation. Sperm cell hyperactivation is needed for sperm motility which is essential late in the preparation of sperm for fertilization.[UniProtKB/Swiss-Prot Function]  
Transcript Variant: This variant (3) lacks several exons in the 5' coding region compared to variant 1. This results in translation initiation from an in-frame downstream AUG, and an isoform (3) with a shorter N-terminus compared to isoform 1.
