

Product datasheet for **SC333337**

DEFB134 (NM_001302695) Human Untagged Clone

Product data:

Product Type: Expression Plasmids
Product Name: DEFB134 (NM_001302695) Human Untagged Clone
Tag: Tag Free
Symbol: DEFB134
Mammalian Cell Selection: Neomycin
Vector: pCMV6-Entry (PS100001)
E. coli Selection: Kanamycin (25 ug/mL)
Fully Sequenced ORF: >SC333337 representing NM_001302695.

Plasmid Map:

ACCN: NM_001302695

Insert Size: 201 bp

OTI Disclaimer: Our molecular clone sequence data has been matched to the reference identifier above as a point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative RNA splicing form or single nucleotide polymorphism (SNP).

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method:

1. Centrifuge at 5,000xg for 5min.
2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

RefSeq: [NM_001302695.1](#)

RefSeq Size: 1096 bp

RefSeq ORF: 201 bp

Locus ID: 613211

UniProt ID: [Q4QY38](#)

Cytogenetics: 8p23.1

Protein Families: Secreted Protein, Transmembrane

MW: 7.6 kDa

Gene Summary: Defensins are cysteine-rich cationic polypeptides that are important in the immunologic response to invading microorganisms. The antimicrobial protein encoded by this gene is secreted and is a member of the beta defensin protein family. Beta defensin genes are found in several clusters throughout the genome, with this gene mapping to a cluster at 8p23. [provided by RefSeq, Nov 2014]
