# Product datasheet for SM037LE

## Integrin alpha 4 (ITGA4) Rat Monoclonal Antibody [Clone ID: PS/2]

### **Product data:**

| Product Type:         | Primary Antibodies   |
|-----------------------|--|
| Clone Name:           | PS/2   |
| Applications:         | FC, FN, IHC, IP  |
| Recommended Dilution: | <u>Flow Cytometry</u> : Use 10μl of 1/50-1/100 diluted antibody to label 10e6 cells in 100 μl.<br><u>Immunohistochemistry on frozen sections</u> .<br><u>Immunoprecipitation</u> .<br><u>Functional assays</u> . |
| Reactivity:           | Human, Mouse   |
| Host:                 | Rat  |
| lsotype:              | lgG2b  |
| Clonality:            | Monoclonal   |
| Specificity:          | This antibody recognises alpha 4 integrin (CD49d). Clone PS/2 has also been reported to block the binding of CD49d to its ligands.   |
| Formulation:          | PBS, pH 7.4<br>State: Low Endotoxin<br>State: Liquid purified IgG fraction.  |
| Concentration:        | lot specific   |
| Purification:         | Affinity Chromatography on Protein G.  |
| Conjugation:          | Unconjugated   |
| Storage:              | Store the antibody undiluted (in aliquots) at -20°C.<br>Avoid repeated freezing and thawing.   |
| Stability:            | Shelf life: one year from despatch.  |
| Gene Name:            | integrin subunit alpha 4   |
| Database Link:        | <u>Entrez Gene 3676 Human</u><br><u>P13612</u>   |

#### **GRIGENE** Integrin alpha 4 (ITGA4) Rat Monoclonal Antibody [Clone ID: PS/2] – SM037LE

Background:Integrin α4 (also called CD49d) is a ~150 kDa protein that possesses a large extracellular<br/>domain involved in ligand binding, a single transmembrane domain, and an intracellular<br/>regulatory domain possessing multiple sites for phosphorylation. Integrin α4 forms<br/>heterodimers with integrins β1 and β7. Integrin α4 is expressed on leukocytes and leukocyte<br/>precursors, neural crest cells, and developing skeletal muscles and is essential for<br/>embryogenesis, hematopoiesis, and immune responses. The presence of integrin α4<br/>promotes cell migration and inhibits cell spreading and contractility. Integrin α4 function has<br/>been implicated in the pathogenesis of multiple diseases including asthma, rheumatoid<br/>arthritis, Crohn's disease, ulcerative colitis, hepatitis C, and multiple sclerosis, and therefore,<br/>modulation of integrin α4 function has become an important target for drug discovery.<br/>Phosphorylation of the serine 988 residue on the integrin α4 cytoplasmic tail inhibits its<br/>interaction with the focal adhesion complex-associated protein paxillin, and modulates its<br/>effects on cell motility and spreading.

Synonyms: Integrin alpha-4, Integrin alpha-IV, VLA-4, VLA4
