IL3RA Mouse Monoclonal Antibody [Clone ID: 6H6]

Product data:

Product Type: Primary Antibodies

Clone Name: 6H6
Applications: FC

Recommended Dilution: Flow Cytometry analysis of human blood cells using 10 μl reagent / 100 μl of whole blood

or 106 cells in a suspension. The content of a vial (1 ml) is sufficient for 100 tests.

Reactivity: Human
Host: Mouse
Isotype: IgG1

Clonality: Monoclonal

Immunogen: IL3 receptor alpha chain expressed on the surface of transiently transfected COS cells

Specificity: This antibody recognizes CD123 (interleukin 3 receptor alpha), a 60-70 kDa transmembrane

protein expressed by myeloid precursors, megakaryocytes, macrophages, dendritic cells, mast cells, basophils, and some B cells. This antibody does not inhibit IL-3 binding to its

receptor.

Formulation: PBS

Label: APC

State: Liquid Ig fraction

Stabilizer: 0.2% (w/v) high-grade protease free BSA

Preservative: 15 mM Sodium Azide

Label: Conjugated with cross-linked Allophycocyanin (APC) under optimum conditions.

Purification: Size-Exclusion Chromatography

Conjugation: APC

Storage: Store the antibody undiluted at 2-8°C.

DO NOT FREEZE!

This product is photosensitive and should be protected from light.

Stability: Shelf life: one year from despatch.

Gene Name: interleukin 3 receptor subunit alpha

Database Link: Entrez Gene 3563 Human

P26951

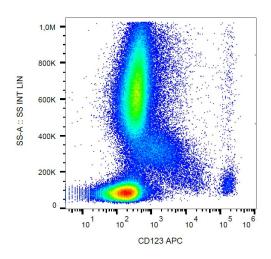

Background: CD123 is the alpha chain of interleukin 3 receptor (IL-3R alpha). This subunit heterodimerizes

with the interleukin 3 receptor beta chain (CD131), which is shared with other receptors. CD123 interacts with IL-3 specifically, but with low affinity, and association with the beta subunit confers high affinity binding to the receptor heterodimer. Both chains are required for signaling, but receptor activation and signal transduction depend on IL-3 binding to CD123

as the initial step.

Synonyms: Interleukin-3 receptor subunit alpha, IL-3R-alpha, IL3 receptor alpha
