

Product datasheet for **SM1550P**

Cd68 Rat Monoclonal Antibody [Clone ID: FA-11]

Product data:

Product Type: Primary Antibodies

Clone Name: FA-11

Applications: FC, IF, IHC, IP, WB

Recommended Dilution: **Western Blot:** Non-reducing conditions recommended.

Immunoprecipitation.

Immunofluorescence.

Flow Cytometry: Use 10 µl of 1/50-1/100 diluted antibody to label 10⁶ cells in 100 µl (Membrane permeabilization is required).

Clone *FA-11* can be used in Flow Cytometry to detect intracellular CD68, following permeabilization, and can detect surface macrosialin at low levels in resident Mouse peritoneal macrophages which can be enhanced with thioglycollate stimulation.

Immunohistochemistry on Frozen Sections.

Immunohistochemistry on Paraffin Sections.

Rat anti Mouse CD68 antibody, Clone *FA-11*, has been used in many mouse models for the identification of CD68 in immunohistochemical studies, using both frozen and paraffin-embedded tissues, See *Masaki, T. et al.* and *Devey, L. et al.* as examples.

-This product may require antigen retrieval using heat treatment prior to staining of paraffin sections. Either sodium citrate buffer or Tris/EDTA buffer may be used for this purpose. See Martin-Manso for details.

-Staining has also been achieved without antigen retrieval, See *Lu et al.* for details.

Reactivity: Mouse

Host: Rat

Isotype: IgG2a

Clonality: Monoclonal

Immunogen: Purified Concanavalin A acceptor glycoprotein from P815 cell line.

Specificity: Clone FA-11 recognizes mouse macrosialin, a heavily glycosylated transmembrane protein and murine homolog of human CD68, which is classified as a unique scavenger receptor (ScR) family member, due to the presence of a lysosome associated membrane protein (LAMP)-like domain.

Formulation: PBS
 State: Purified
 State: Liquid purified IgG fraction from Tissue Culture Supernatant
 Preservative: 0.09% Sodium Azide

Concentration: lot specific

Purification: Affinity Chromatography on Protein G

Conjugation: Unconjugated

Storage: Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer.
 Avoid repeated freezing and thawing.

Stability: Shelf life: one year from despatch.

Gene Name: CD68 antigen

Database Link: [Entrez Gene 12514 Mouse P31996](#)

Background: CD68 is considered a pan macrophage marker, predominantly expressed on the intracellular lysosomes of tissue macrophages/monocytes, including Kupffer cells, microglia, histiocytes and osteoclasts, and is expressed to a lesser extent by dendritic cells and peripheral blood granulocytes.
 CD68 is expressed by many tumor types including some B cell lymphomas, blastic NK lymphomas, melanomas, granulocytic (myeloid) sarcomas, hairy cell leukemias, and renal, urinary and pancreatic tumors, and can be used in cancer studies to demonstrate the presence/localization of macrophages.

Synonyms: Gp110, Macrosialin, Macrophage marker
