## Estrogen Receptor 1 (ESR1) Mouse Monoclonal Antibody [Clone ID: 6F11]

**Product data:** 

**Product Type:** Primary Antibodies

Clone Name: 6F11
Applications: IHC

Recommended Dilution: Immunohistochemistry on Frozen Sections (1/40-1/60): Zambonis fixative recommended

for best results.

Immunohistochemistry on Paraffin Sections (1/40-1/80): Rquires Antigen retrieval using

heat treatment prior to staining of paraffin sections. Sodium citrate buffer pH6.0 is

recommended for this purpose.

Recommended Positive Control: Breast carcinoma.

Reactivity: Human
Host: Mouse
Isotype: IgG1

Clonality: Monoclonal

Immunogen: Recombinant Human Eestrogen Receptor (alpha form).

**Specificity:** This antibody recognises the Estrogen Receptor alpha chain.

The oestrogen receptor status of breast cancer tissues is an important parameter in

determining prognosis and response to therapy.

Formulation: State: Supernatant

State: Liquid Tissue Culture Supernatant containing 0.09% Sodium Azide.

**Conjugation:** Unconjugated

Storage: Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer.

Avoid repeated freezing and thawing.

**Stability:** Shelf life: one year from despatch.

**Gene Name:** estrogen receptor 1

Database Link: Entrez Gene 2099 Human

P03372

## Estrogen Receptor 1 (ESR1) Mouse Monoclonal Antibody [Clone ID: 6F11] - SM1715T

Background:

Estrogen Receptor alpha is a 65 kDa protein and a member of the steroid family of nuclear receptors. Estrogen Receptor alpha is a ligand-activated transcription factor that, when bound to estrogen, induces a conformational change that allows dimerization and binding to estrogen response element sequences. When bound to DNA, Estrogen Receptor alpha can positively or negatively regulate gene transcription.

Like other steroid hormone receptors, Estrogen Receptors are intracellular proteins. Estrogen Receptors play an important role in regulating mammary gland growth and differentiation. Breast tumors that are ER positive may also show a more favorable response to anti-estrogen

therapies

Synonyms:

ER alpha, Estradiol receptor, ESR1, ESR, NR3A1
