# Product datasheet for SM1742F

### B7-1 (CD80) Mouse Monoclonal Antibody [Clone ID: MEM-233]

### **Product data:**

Product Type:	Primary Antibodies
Clone Name:	MEM-233
Applications:	FC
Recommended Dilution:	<b>Flow Cytometry analysis</b> of human blood cells using 20 $\mu$ l reagent / 100 $\mu$ l of whole blood or 10 <sup>6</sup> cells in a suspension. The content of a vial (2 ml) is sufficient for 100 tests.
Reactivity:	Human
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Extracellular domain of human CD80 fused to human lgG1(Fc)
Specificity:	This antibody reacts with CD80 (B7-1), a 60 kDa single chain type I glycoprotein of immunoglobulin supergene family, expressed on professional antigen-presenting cells, such as dendritic cells, macrophages or activated B lymphocytes.
Formulation:	PBS containing 15 mM sodium azide Label: FITC State: Liquid purified lg fraction Label: Conjugated with Fluorescein isothiocyanate (FITC) under optimum conditions. The reagent is free of unconjugated FITC and adjusted for direct use.
Conjugation:	FITC
Storage:	Store undiluted at 2-8°C. <b>DO NOT FREEZE!</b> This product is photosensitive and should be protected from light.
Stability:	Shelf life: one year from despatch.
Gene Name:	CD80 molecule
Database Link:	<u>Entrez Gene 941 Human</u> <u>P33681</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

# Synonyms:B7-1 (CD80) Mouse Monoclonal Antibody [Clone ID: MEM-233] - SM1742FBackground:CD80 (B7-1) and CD86 (B7-2) are ligands of T cell critical costimulatory molecule CD28 and of<br/>an inhibitory receptor CTLA-4 (CD152). The both B7 molecules are expressed on professional<br/>antigen-presenting cells and are essential for T cell activation, the both molecules can also<br/>substitute for each other in this process. The question what are the differences in CD80 and<br/>CD86 competency has not been fully elucidated yet; there are still conflicts in results about<br/>their respective roles in initiation or sustaining of the T cell immune response.Synonyms:CD28LG, CD28LG1, LAB7, BB1, B7.1, B7-1

## Product images:

Surface staining of CD80-transfected P815 cells with anti-human CD80 (MEM-233) FITC.
