CD34 Mouse Monoclonal Antibody [Clone ID: 581]

Product data:

Product Type: Primary Antibodies

Clone Name: 581
Applications: FC

Recommended Dilution: Flow Cytometry analysis of human blood cells using 10 μl reagent / 100 μl of whole blood

or 106 cells in a suspension.

The content of a vial (1 ml) is sufficient for 100 tests.

Reactivity: Human, Primate (Does not react with: Sheep)

Host: Mouse Isotype: IgG1

Clonality: Monoclonal

Specificity: This antibody reacts with CD34 (Mucosialin), a 110-115 kDa monomeric transmembrane

phosphoglycoprotein expressed on hematopoietic progenitors cells and on the most pluripotential stem cells; it is gradually lost on progenitor cells. The antibody recognizes the

class III CD34 epitope resistant to neuraminidase, chymopapain and glycoprotease.

Formulation: Phosphate buffered saline (PBS)

Label: PerCP

State: Liquid purified Ig fraction Preservative: 15 mM sodium azide

Label: Conjugated with Peridinin-chlorophyll-protein complex (PerCP) under optimum conditions. The conjugate is purified by size-exclusion chromatography and adjusted for

direct use.

Conjugation: PerCP

Storage: Store undiluted at 2-8°C. DO NOT FREEZE!

This products is photosensitive and should be protected from light.

Stability: Shelf life: one year from despatch.

Gene Name: CD34 molecule

Database Link: Entrez Gene 947 Human

P28906

CD34 Mouse Monoclonal Antibody [Clone ID: 581] - SM1791PP

Background:

CD34 is a highly glycosylated monomeric 111-115 kDa surface protein, which is present on many stem cell populations. It is a well established stem cell marker, though its expression on human hematopoietic stem cells is reversible. CD34 probably serves as a surface receptor that undergoes receptor-mediated endocytosis and regulates adhesion, differentiation and proliferation of hematopoietic stem cells and other progenitors. CD34 expression is likely to represent a specific state of hematopoietic development that may have altered adhering properties with expanding and differentiating capabilities in both in vitro and in vivo conditions.

Synonyms:

Hematopoietic progenitor cell marker
