## CD63 Mouse Monoclonal Antibody [Clone ID: MEM-259]

**Product data:** 

**Product Type:** Primary Antibodies

Clone Name: MEM-259

Applications: FC, IF

Recommended Dilution: Flow Cytometry: analysis of Human blood cells using 20 μl reagent / 100 μl of whole blood

or 106 cells in a suspension.

The content of a vial (2 ml) is sufficient for 100 tests.

Reactivity: Human
Host: Mouse
Isotype: IgG1

Clonality: Monoclonal

Immunogen: HPB-ALL T cell line

**Specificity:** This antibody reacts with CD63 (LAMP-3), a 40-60 kDa tetraspan glycoprotein expressed by

granulocytes, platelets, T cells, monocytes/macrophages and endothelial cells. Cell surface

exposition of CD63 is usually activation-dependent.

Formulation: Phosphate Buffered Saline (PBS)

Label: FITC

State: Liquid purified Ig fraction Preservative: 15 mM Sodium Azide Label: Fluorescein Isothiocyanate.

The reagent is free of unconjugated and adjusted for direct use

Conjugation: FITC

**Storage:** Store the antibody undiluted at 2-8°C.

Do Not Freeze!

This product is photosensitive and should be protected from light.

**Stability:** Shelf life: one year from despatch.

Gene Name: CD63 molecule

**Database Link:** Entrez Gene 967 Human

P08962

Background:

**CD63** (LAMP-3, lysosome-associated membrane protein-3), a glycoprotein of tetraspanin family, is present in late endosomes, lysosomes and secretory vesicles of various cell types. It is also present in the plasma membrane, usually following cell activation. Hence, it has become an widely used basophil activation marker. In mast cells, however, CD63 exposition does not need their activation. CD63 interacts with integrins and affects phagocytosis and cell migration, it is also involved in H/K-ATPase trafficking regulation of ROMK1 channels. CD63 also serves as a T-cell costimulation molecule. Expression of CD63 can be used for predicting the prognosis in earlier stages of carcinomas.

Synonyms:

OMA81H, Granulophysin, Tetraspanin-30, MLA1, TSPAN30, ME491
