

Product datasheet for **SM3084B**

CD33 Mouse Monoclonal Antibody [Clone ID: HIM3-4]

Product data:

Product Type:	Primary Antibodies
Clone Name:	HIM3-4
Applications:	FC
Recommended Dilution:	Indirect Immunofluorescence analysis by Flow Cytometry (1/1000).
Reactivity:	Human
Host:	Mouse
Isotype:	IgG1
Clonality:	Monoclonal
Immunogen:	NFMY-9s Human cell line.
Specificity:	The antibody <i>HIM3-4</i> reacts with CD33, a 67 kDa type I transmembrane glycoprotein (immunoglobulin superfamily) expressed on myeloid progenitors, monocytes, granulocytes, dendritic cells and mast cells; it is absent on platelets, lymphocytes, erythrocytes and hematopoietic stem cells. HLDA V; WS Code M MA112. HLDA VI; WS Code M MA47.
Formulation:	PBS, pH~7.4 Label: Biotin State: Liquid purified Ig fraction Preservative: 15 mM Sodium Azide Label: -LC-NHS, The reagent is free of unconjugated Biotin.
Concentration:	lot specific
Purification:	Affinity Chromatography
Conjugation:	Biotin
Storage:	Store undiluted at 2-8°C. DO NOT FREEZE!
Stability:	Shelf life: one year from despatch.
Gene Name:	CD33 molecule

Background: CD33 is a transmembrane protein of the sialic acid-binding immunoglobulin-like lectin (Siglec) family. It belongs to the immunoreceptor tyrosine-based inhibitory motif (ITIM)-containing molecules able of recruiting protein tyrosine phosphatases SHP-1 and SHP-2 to signal assemblies; these ITIMs are also used for ubiquitin-mediated removal of the receptor from the cell surface. CD33 is expressed on cells of myelomonocytic lineage, binds sialic acid residues in N- and O-glycans on cell surfaces, and is a therapeutic target for acute myeloid leukemia.

Synonyms: Siglec-3, gp67
