Glycophorin A (GYPA) (N-term) Mouse Monoclonal Antibody [Clone ID: HIR2]

Product data:

Product Type: Primary Antibodies

Clone Name: HIR2
Applications: FC

Recommended Dilution: Flow Cytometry analysis of human blood cells using 20 μl reagent / 100 μl of whole blood

or 106 cells in a suspension.

Reactivity: Human
Host: Mouse
Isotype: IgG2b

Clonality: Monoclonal

Immunogen: Synthetic peptide (Human, N-terminal)

Specificity: The mouse monoclonal antibody HIR2 recognizes an epitope within the N-terminal

(extracellular) portion of CD235a (glycophorin A) and CD235b (glycophorin B). Its antigen is expressed on early erythroblasts, late erythroblasts, erythroblasts, mature erythrocytes and

the cells of erythroid cell lines K562 and HEL, but not on all other cells.

Formulation: Phosphate buffered saline (PBS) solution containing 15mM sodium azide

Label: PE

State: Liquid Ig fraction

Label: Conjugated with R-Phycoerythrin

Purification: Size-exclusion chromatography

Conjugation: PE

Storage: Store the antibody at 2 - 8 °C. DO NOT FREEZE! This product is photosensitive and should be

protected from light.

Stability: Shelf life: one year from despatch.

Gene Name: glycophorin A (MNS blood group)

Database Link: Entrez Gene 2993 Human

P02724

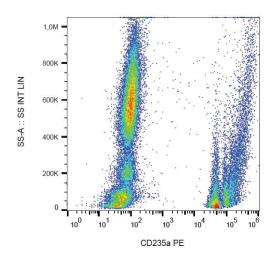

Background:

CD235a (Glycophorin A, GPA) is a transmembrane sialoglycoprotein expressed on erythrocytes and their precursors. Similarly to glycophorin B (GPB), these molecules provide the cells with a large mucin-like surface, which minimalizes aggregation between erythrocytes in the circulation. GPA is the carrier of blood group M and N specificities, while GPB accounts for S, s and U specificities. CD235a is a receptor of Hsa, an Streptococcus adhesin.

Synonyms:

Glycophorin-A, GPA, PAS-2, Sialoglycoprotein alpha, MN sialoglycoprotein
