

Product datasheet for **SP2117P**

DAD1 Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	IF, WB
Recommended Dilution:	Western blot: 0.5 µg/ml - 2.0 µg/ml; this antibody detects a band of approximately 22kDa in HepG2 cell lysates. Immunocytochemistry.
Reactivity:	Human, Mouse
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	Synthetic peptide corresponding to a fourteen amino acid sequence within the C-Terminal region of human DAD1
Specificity:	This antibody is specific for defender of apoptotic cell death 1 (DAD1).
Formulation:	PBS containing 0.02% Sodium Azide State: Aff - Purified State: Liquid purified IgG
Concentration:	lot specific
Purification:	Affinity chromatography
Conjugation:	Unconjugated
Storage:	Store the antibody undiluted at 2-8°C for up to one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	defender against cell death 1
Database Link:	Entrez Gene 1603 Human P61803
Background:	DAD1 was discovered as a negative regulator of programmed cell death, and has since been identified as a subunit of the mammalian oligosaccharyltransferase complex (OCT). DAD1 is required for the function and structural integrity of OCT.
Synonyms:	DAD-1, OST2
