## HOXA10 Human siRNA Oligo Duplex (Locus ID 3206)

## Product data:

Product Type:
Purity:
Quality Control:
Sequences:
Stability:
\# of transfections:

Note:
RefSeq:
UniProt ID:
Synonyms:
Components:

Summary:
siRNA Oligo Duplexes
HPLC purified
Tested by ESI-MS
Available with shipment
One year from date of shipment when stored at $-20^{\circ} \mathrm{C}$.
Approximately 330 transfections $/ 2 \mathrm{nmol}$ in 24 -well plate under optimized conditions (final conc. 10 nM ).

Single siRNA duplex (10nmol) can be ordered.
NM 018951, NM 153715, NR 037939
P31260
HOX1; HOX1.8; HOX1H; PL
HOXA10 (Human) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 3206) Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol Included - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml
In vertebrates, the genes encoding the class of transcription factors called homeobox genes are found in clusters named $A, B, C$, and $D$ on four separate chromosomes. Expression of these proteins is spatially and temporally regulated during embryonic development. This gene is part of the A cluster on chromosome 7 and encodes a DNA-binding transcription factor that may regulate gene expression, morphogenesis, and differentiation. More specifically, it may function in fertility, embryo viability, and regulation of hematopoietic lineage commitment. Alternatively spliced transcript variants have been described. Readthrough transcription also exists between this gene and the downstream homeobox A9 (HOXA9) gene. [provided by RefSeq, Mar 2011]

## Performance <br> Guaranteed:

OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will provide at least 70\% or more knockdown of the target mRNA when used at 10 nM concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control duplex (cat\# SR30002) indicates that >90\% of the cells have been transfected and the HPRT positive control (cat\# SR30003) provides 90\% knockdown efficiency.

For non-conforming siRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with newly designed duplexes, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data required).
