

# Product datasheet for SR303243

## YB1 (YBX1) Human siRNA Oligo Duplex (Locus ID 4904)

### **Product data:**

| Product Type:       | siRNA Oligo Duplexes   |
|---------------------|--|
| Purity:             | HPLC purified  |
| Quality Control:    | Tested by ESI-MS   |
| Sequences:          | Available with shipment  |
| Stability:          | One year from date of shipment when stored at -20°C.   |
| # of transfections: | Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final conc. 10 nM).   |
| Note:               | Single siRNA duplex (10nmol) can be ordered.   |
| RefSeq:             | <u>NM 004559, NR 132737</u>  |
| UniProt ID:         | <u>P67809</u>  |
| Synonyms:           | BP-8; CBF-A; CSDA2; CSDB; DBPB; EFI-A; MDR-NF1; NSEP-1; NSEP1; YB-1; YB1   |
| Components:         | YBX1 (Human) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 4904)<br>Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol<br>Included - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml  |
| Summary:            | This gene encodes a highly conserved cold shock domain protein that has broad nucleic acid<br>binding properties. The encoded protein functions as both a DNA and RNA binding protein<br>and has been implicated in numerous cellular processes including regulation of transcription<br>and translation, pre-mRNA splicing, DNA reparation and mRNA packaging. This protein is also<br>a component of messenger ribonucleoprotein (mRNP) complexes and may have a role in<br>microRNA processing. This protein can be secreted through non-classical pathways and<br>functions as an extracellular mitogen. Aberrant expression of the gene is associated with<br>cancer proliferation in numerous tissues. This gene may be a prognostic marker for poor<br>outcome and drug resistance in certain cancers. Alternate splicing results in multiple<br>transcript variants. Pseudogenes of this gene are found on multiple chromosomes. [provided<br>by RefSeq, Sep 2015] |

# YB1 (YBX1) Human siRNA Oligo Duplex (Locus ID 4904) - SR303243Performance<br/>Guaranteed:OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will<br/>provide at least 70% or more knockdown of the target mRNA when used at 10 nM<br/>concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control<br/>duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT<br/>positive control (cat# SR30003) provides 90% knockdown efficiency.For non-conforming siRNA, requests for replacement product must be made within ninety<br/>(90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with<br/>newly designed duplexes, please contact Technical Services at techsupport@origene.com.<br/>Please provide your data indicating the transfection efficiency and measurement of gene<br/>expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data<br/>required).
