Product datasheet for SR303269

ornithine aminotransferase (OAT) Human siRNA Oligo Duplex (Locus ID 4942)

Product data:

Product Type:	siRNA Oligo Duplexes
Purity:	HPLC purified
Quality Control:	Tested by ESI-MS
Sequences:	Available with shipment
Stability:	One year from date of shipment when stored at -20°C.
# of transfections:	Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final conc. 10 nM).
Note:	Single siRNA duplex (10nmol) can be ordered.
RefSeq:	<u>NM_000274, NM_001171814, NM_001322965, NM_001322966, NM_001322967, NM_001322974, NM_001322974</u>
UniProt ID:	<u>P04181</u>
Synonyms:	GACR; HOGA; OATASE; OKT
Components:	OAT (Human) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 4942) Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol Included - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml
Summary:	This gene encodes the mitochondrial enzyme ornithine aminotransferase, which is a key enzyme in the pathway that converts arginine and ornithine into the major excitatory and inhibitory neurotransmitters glutamate and GABA. Mutations that result in a deficiency of this enzyme cause the autosomal recessive eye disease Gyrate Atrophy. Alternatively spliced transcript variants encoding different isoforms have been described. Related pseudogenes have been defined on the X chromosome. [provided by RefSeq, Jan 2010]

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2021 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	ornithine aminotransferase (OAT) Human siRNA Oligo Duplex (Locus ID 4942) – SR303269
Performance	OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will
Guaranteed:	provide at least 70% or more knockdown of the target mRNA when used at 10 nM
	concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control
	duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT
	positive control (cat# SR30003) provides 90% knockdown efficiency.
	For non-conforming siRNA, requests for replacement product must be made within ninety
	(90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with

newly designed duplexes, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data

required).
