## Product datasheet for SR304075

## Relaxin 2 (RLN2) Human siRNA Oligo Duplex (Locus ID 6019)

## **Product data:**

| Product Type:       | siRNA Oligo Duplexes   |
|---------------------|--|
| Purity:             | HPLC purified  |
| Quality Control:    | Tested by ESI-MS   |
| Sequences:          | Available with shipment  |
| Stability:          | One year from date of shipment when stored at -20°C.   |
| # of transfections: | Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final conc. 10 nM).   |
| Note:               | Single siRNA duplex (10nmol) can be ordered.   |
| RefSeq:             | <u>NM 001329191, NM 005059, NM 134441</u>  |
| UniProt ID:         | <u>P04090</u>  |
| Synonyms:           | bA12D24.1.1; bA12D24.1.2; H2; H2-RLX; RLXH2  |
| Components:         | RLN2 (Human) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 6019)<br>Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol<br>Included - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml  |
| Summary:            | This gene encodes a member of the relaxin subfamily and insulin superfamily of peptide<br>hormones. In humans there are three non-allelic relaxin genes. This gene encodes multiple<br>protein isoforms, at least one of which undergoes proteolytic processing. This processing<br>generates relaxin A and B chains that are linked by disulfide bonds to form the mature<br>peptide hormone. This hormone plays a role in the male and female reproductive systems<br>and was initially noted for its role in pregnancy. This protein also plays broader roles in the<br>cardiovascular system, including in the regulation of blood pressure and control of heart rate,<br>and data from animal models shows that this protein may have anti-fibrotic and<br>cardioprotective effects. [provided by RefSeq, Jul 2016] |

|                            | Relaxin 2 (RLN2) Human siRNA Oligo Duplex (Locus ID 6019) – SR304075   |
|----------------------------|--|
| Performance<br>Guaranteed: | OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will<br>provide at least 70% or more knockdown of the target mRNA when used at 10 nM<br>concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control<br>duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT<br>positive control (cat# SR30003) provides 90% knockdown efficiency.                              |
|                            | For non-conforming siRNA, requests for replacement product must be made within ninety<br>(90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with<br>newly designed duplexes, please contact Technical Services at techsupport@origene.com.<br>Please provide your data indicating the transfection efficiency and measurement of gene<br>expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data |

required).
