#### **TEAD3 Human siRNA Oligo Duplex (Locus ID 7005)**

**Product data:** 

**Product Type:** siRNA Oligo Duplexes

Purity: HPLC purified

**Quality Control:** Tested by ESI-MS

Sequences: Available with shipment

**Stability:** One year from date of shipment when stored at -20°C.

# of transfections: Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final

conc. 10 nM).

**Note:** Single siRNA duplex (10nmol) can be ordered.

 RefSeq:
 NM 003214

UniProt ID: Q99594

**Synonyms:** DTEF-1; ETFR-1; TEAD-3; TEAD5; TEF-5; TEF5

Components: TEAD3 (Human) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 7005)

Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol

Included - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml

**Summary:** This gene product is a member of the transcriptional enhancer factor (TEF) family of

transcription factors, which contain the TEA/ATTS DNA-binding domain. It is predominantly

expressed in the placenta and is involved in the transactivation of the chorionic

somatomammotropin-B gene enhancer. Translation of this protein is initiated at a non-AUG

(AUA) start codon. [provided by RefSeq, Jul 2008]

#### TEAD3 Human siRNA Oligo Duplex (Locus ID 7005) - SR304774

# Performance Guaranteed:

OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will provide at least 70% or more knockdown of the target mRNA when used at 10 nM concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT positive control (cat# SR30003) provides 90% knockdown efficiency.

For non-conforming siRNA, requests for replacement product must be made within ninety (90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with newly designed duplexes, please contact Technical Services at techsupport@origene.com. Please provide your data indicating the transfection efficiency and measurement of gene expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data required).
