## Product datasheet for SR306356

## VPS26 (VPS26A) Human siRNA Oligo Duplex (Locus ID 9559)

## **Product data:**

| Product Type:       | siRNA Oligo Duplexes   |
|---------------------|--|
| Purity:             | HPLC purified  |
| Quality Control:    | Tested by ESI-MS   |
| Sequences:          | Available with shipment  |
| Stability:          | One year from date of shipment when stored at -20°C.   |
| # of transfections: | Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final conc. 10 nM).   |
| Note:               | Single siRNA duplex (10nmol) can be ordered.   |
| RefSeq:             | <u>NM 001035260, NM 001318944, NM 001318945, NM 001318946, NM 004896</u>   |
| UniProt ID:         | <u>075436</u>  |
| Synonyms:           | HB58; Hbeta58; PEP8A; VPS26  |
| Components:         | VPS26A (Human) - 3 unique 27mer siRNA duplexes - 2 nmol each (Locus ID 9559)<br>Included - SR30004, Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol<br>Included - SR30005, RNAse free siRNA Duplex Resuspension Buffer - 2 ml  |
| Summary:            | This gene belongs to a group of vacuolar protein sorting (VPS) genes. The encoded protein is<br>a component of a large multimeric complex, termed the retromer complex, involved in<br>retrograde transport of proteins from endosomes to the trans-Golgi network. The close<br>structural similarity between the yeast and human proteins that make up this complex<br>suggests a similarity in function. Expression studies in yeast and mammalian cells indicate<br>that this protein interacts directly with VPS35, which serves as the core of the retromer<br>complex. Alternative splicing results in multiple transcript variants encoding different<br>isoforms. [provided by RefSeq, Jul 2008] |

|                            | VPS26 (VPS26A) Human siRNA Oligo Duplex (Locus ID 9559) – SR306356   |
|----------------------------|--|
| Performance<br>Guaranteed: | OriGene guarantees that at least two of the three Dicer-Substrate duplexes in the kit will<br>provide at least 70% or more knockdown of the target mRNA when used at 10 nM<br>concentration by quantitative RT-PCR when the TYE-563 fluorescent transfection control<br>duplex (cat# SR30002) indicates that >90% of the cells have been transfected and the HPRT<br>positive control (cat# SR30003) provides 90% knockdown efficiency.                              |
|                            | For non-conforming siRNA, requests for replacement product must be made within ninety<br>(90) days from the date of delivery of the siRNA kit. To arrange for a free replacement with<br>newly designed duplexes, please contact Technical Services at techsupport@origene.com.<br>Please provide your data indicating the transfection efficiency and measurement of gene<br>expression knockdown compared to the scrambled siRNA control (quantitative RT-PCR data |

required).
